

**ENGINEERING H192
PRELIMINARY ASSIGNMENT 23**

1. What preprocessor declaration must be used to allow use of “cin” rather than “std::cin”?
2. In order to use stream input/output features in C++, what header file must be included?
3. What is the name of the operator “<<”?

Given the class definition:

```
Class Product
{
    public:
        Product();
        void Display();
        void ChangePrice();
        float AddPrices(Product);
    private:
        char Item[30];
        float Price;
};
```

4. What are the attributes of an object of the class Product?
5. What are the operations available for an object of the class Product?
- 6.-7. Can a function outside of the class directly access the value Price of an object of Product? Why or why not?
8. How would you call the ChangePrice function in a program in order to modify the price of a Product object named Product1?

Name _____ **Instr.** _____ **Room** _____ **Seat** _____ **Hour** _____
